BEFORE *YOU* BEGIN

Before beginning the program, it's highly recommended to watch the video lessons covering boxing basics below on the next page. This will provide you with a solid understanding of various techniques, including movement, offense, and defense. Take your time to absorb these lessons and practice your form, especially if you're new to boxing. Skipping this crucial step might lead to confusion and difficulty in following the program, so dedicate a few days or even weeks to learning and practicing the fundamentals.

Watch the welcome video where I explain how to get the best out of the plan and make sure to join our WhatsApp community – just click the underlined text below!

2 PLANS IN THE PACKAGE

Beginner Training – For those just getting started or with basic experience.

Competitive Training – For those who know the fundamentals and are ready to accelerate their progress. This plan follows an old-school Ukrainian boxing style, proven to develop high-level fighters.

8 WORKOUTS PER WEEK

5 boxing + 3 conditioning for maximum performance improvement. If you can't complete all sessions, you can adjust the schedule to fit your needs while maintaining consistency.

STRENGTH & CONDITIONING

The package includes weightlifting plans (one shared by two plans and a different one for the old-school plan), running workouts, and a circuit workout. Pay attention to proper form and load management to avoid injuries and excessive fatigue.

CONTINUED...

DEMONSTRATIONS

During demonstrations, I avoid targeting my partner's head because he has visual impairments. However, if both you and your partner are in good health, it's acceptable to aim for the head. Keep in mind, this doesn't imply hitting hard or treating each other as opponents. Remember, it's a practice session meant for learning and skill improvement.

N1 AND N2 MEANING

In our notation, 'n1' refers to person number 1, and 'n2' refers to person number 2. Each person has a designated role for each round, and you will switch roles to practice various aspects.

SWITCHING ROLES

When I mention 'switch roles,' it means you should mimic your partner's actions, and vice versa. This change can occur either after each attack or halfway through the round, depending on the drill.

EQUIPMENT AND PARTNERS

This 15-week comprehensive boxing training program comprises various shadow boxing, partner drills, and bag work exercises. If you don't have access to a training partner or punching bags, you can adapt the partner and bag work drills for shadow boxing. Additionally, consider inviting a friend to join your training sessions for added motivation and a more interactive experience.

TECHNIQUE

If you find certain exercises challenging, it's advisable to take it slow, concentrate on refining your technique, and opt for simpler variations. This holds true for both boxing drills and strength and conditioning exercises.

SUCCESS ***TIP*** ***SHEET***

PROPER TECHNIQUE:

Focus on learning and mastering the fundamental boxing techniques, such as the footwork moves, 6 basic punches, defensive moves. Ensure that you have the correct form and body mechanics to maximize effectiveness and reduce the risk of injury.

INCREASE INTENSITY:

As a beginner, it's important to gradually increase the intensity and duration of your workouts. Don't push yourself too hard too soon. Start with lighter exercises and gradually progress to more challenging drills, lifts and sparring sessions.

FOCUS ON CONDITIONING:

Boxing requires a good level of cardiovascular endurance, strength, speed and overall fitness. Which includes conditioning exercises like skipping rope and running to improve your endurance; and resistance training to enhance your strength and speed.

PRIORITIZE CONSISTENCY:

Consistency is vital in any training program. Stick to a regular schedule and make boxing training a part of your routine. Consistent practice will help you improve your skills, conditioning, and overall performance.

LISTEN TO YOUR BODY:

Pay attention to your body's signals and slow down when needed. Overtraining can lead to injuries and hinder progress. Allow your body to recover and regenerate.

WARM UP AND COOL DOWN:

Always start your training sessions with a proper warm-up to prepare your body for the physical demands of boxing. Incorporate dynamic stretches and light cardiovascular exercises. Similarly, end your sessions with a cool-down, which includes static stretching to improve flexibility and promote recovery.

CONTINUED...

INCLUDE SPARRING SESSIONS:

Once you have a solid foundation of boxing skills, gradually introduce controlled sparring sessions under the guidance of a coach. Sparring helps you apply your techniques, improve timing, and develop ring awareness.

STAY HUMBLE AND RESPECTFUL:

Boxing teaches discipline, respect, and sportsmanship. Treat your training partners and opponents with respect both inside and outside the ring. Maintain a humble attitude and always be open to learning from others.

REP ALL 3 PHASES OF ATTACKING:

Entrance (how you get in the range by using footwork, head movement and feints), **punching** (throwing single punches and combinations), **exit** (how you get to a solid position after the attack by using defensive moves)

DEVELOP MENTAL TOUGHNESS:

Boxing requires mental toughness and resilience. Stay focused, maintain composure, and develop mental strategies to overcome challenges during training and in the ring. Visualize success and adopt a positive mindset.

TAKE CARE OF YOUR BODY:

Proper nutrition, hydration, and rest are crucial for optimal performance and recovery. Fuel your body with nutritious foods, stay hydrated, and get enough sleep to support your training and overall well-being

SHADOW BOXING TIPS

FOCUS ON FORM:

Use shadow boxing to work on your boxing fundamentals. Pay attention to your stance, guard, footwork, and balance. Practice proper punching techniques and combinations.

VISUALIZE AN OPPONENT:

Visualize an Opponent: Imagine you are facing an opponent and react to their movements. This will make your shadow boxing more realistic and help improve your boxing instincts.

CONTROL YOUR BREATHING:

Breathe rhythmically and stay relaxed while shadow boxing. Proper breathing helps maintain your energy levels throughout the session.

USE THE ENTIRE SPACE:

Move around the area freely and practice footwork patterns. Work on angles, pivots, and lateral movement to become a more elusive and agile fighter.

VARY THE INTENSITY:

Shadow boxing can be done at different intensities. Incorporate periods of fast-paced combinations and footwork drills, as well as slower, more controlled movements for technique refinement.

MIX UP PUNCHING COMBINATIONS:

Experiment with different punching combinations. Include jabs, crosses, hooks, uppercuts, and other techniques to develop versatility in your offense.

CONTINUED...

VISUALIZE DEFENSIVE MOVEMENTS

Practice defensive techniques like slipping, rolling, and blocking. Visualize incoming punches and respond accordingly.

STAY ENGAGED MENTALLY

Keep your mind focused on the task at hand. Concentrate on each punch and movement, maintaining a strong mind-muscle connection.

ADD SHADOW SPARRING

Incorporate shadow sparring sessions where you mimic the movements and reactions of an opponent. This helps improve your counter-punching skills and defensive reflexes.

SET GOALS

Have specific objectives for each shadow boxing session. Whether it's improving a particular combination or working on a specific aspect of your technique, set goals to track your progress.

RECORD YOURSELF

Occasionally record your shadow boxing sessions to review your form and identify areas for improvement.

SHADOW BOX REGULARLY

Consistency is key to improvement. Include shadow boxing in your regular training routine to see significant progress over time.

PARTNER WORK TIPS

SAFETY FIRST

Always prioritize safety during sparring. Wear proper protective gear, including headgear, mouthguard, gloves, and hand wraps. Communicate with your sparring partner to ensure a safe and controlled session.

START SLOW

If you're a beginner, begin with light sparring sessions. Gradually increase the intensity as you gain more experience and confidence.

FOCUS ON TECHNIQUE

Use sparring as an opportunity to work on your technique. Practice the combinations and movements you've learned during training.

STAY RELAXED

Keep yourself relaxed and composed during sparring. Tension can lead to fatigue and poor performance. Breathing rhythmically helps maintain your composure.

USE HEAD MOVEMENT

Work on your head movement to avoid getting hit cleanly. Slip, bob and weave, and use footwork to create angles and minimize your opponent's chances of landing punches.

RESPECT YOUR PARTNER

Treat your sparring partner with respect and consideration. Avoid unnecessary roughness and control your punches.

CONTINUED...

SET GOALS:

Before each sparring session, set specific goals for what you want to work on. Whether it's improving your defense, footwork, or counter-punching, having a clear focus will enhance your development.

USE DIFFERENT RANGES

Practice fighting at various ranges, including long-range, mid-range, and close-quarters. This will improve your adaptability in different situations.

LEARN FROM MISTAKES

Embrace the learning process and view sparring as an opportunity to improve. Don't get discouraged by mistakes but instead, learn from them and work on correcting them.

STAY CALM UNDER PRESSURE

As sparring can be intense, practice staying calm under pressure. Focus on your breathing and stay composed, even in challenging situations.

SPAR WITH DIFFERENT STYLES

Spar with various partners who have different styles and skill levels. This will help you adapt to different opponents and develop a well-rounded game.

ANALYZE YOUR SPARRING

After each sparring session, take some time to review what went well and what you need to work on. This self-analysis will guide your training and help you progress faster.

STAY PRESENT AND FOCUSED

Keep your mind in the moment. Observe your partner's movements, and analyze the situation. Avoid distractions and maintain focus on the sparring match and your tactics.

Focus on your approach to your partner and always exit with a defensive move to avoid getting hit

***HAVING A PARTNER ISN'T
CRUCIAL IN THIS PACKAGE.
DO THE VIRTUAL SPARRINGS
AND BAG WORK, BUT IT'S
ALWAYS A GOOD IDEA TO
BRING A PARTNER!***

PRACTICAL SPARRING TIPS

ANALYZE YOUR OPPONENT

Before the sparring starts, take a moment to analyze your opponent's style and tendencies. This will help you form a strategic approach.

START LIGHTLY

Avoid going blow for blow right from the start. Begin with light and controlled exchanges to warm up and get a feel for your opponent's movements.

OBSERVE THEIR REACTIONS

Watch how your opponent reacts to your punches. Pay attention to openings and vulnerabilities that you can exploit.

USE SET-UPS

Based on your observations, employ set-ups to create opportunities for effective strikes and combinations.

UTILIZE DIFFERENT TRICKS

Draw from a library of tips and tricks to keep your opponent guessing and off-balance.

MONITOR ENERGY LEVELS

Be mindful of your energy throughout the sparring session. Pace yourself to avoid gassing out too early or having excess energy left.

BAG WORK TIPS

MAINTAIN PROPER FORM

Focus on keeping your hands up, elbows in, and chin down. Practice using correct footwork and maintain a good stance throughout your bag work.

MIX UP YOUR COMBOS

Vary your combinations while working the bag. Practice throwing jabs, straights, hooks, and uppercuts in different sequences to improve your fluency in executing different punches.

WORK ON SPEED AND POWER

Alternate between fast and light punches for speed and quickness training, and powerful, explosive punches to develop strength and power.

MOVE AROUND THE BAG

Don't stand still in front of the bag. Move around, pivot, and circle the bag to simulate real fight scenarios and improve your footwork.

FOCUS ON ACCURACY

Aim your punches at specific spots on the bag, such as the center or sides. This helps improve your accuracy and targeting during a match.

VISUALIZE AN OPPONENT

Imagine the bag as your opponent and work on your defensive movements, such as slipping, ducking, and blocking, while counterattacking with well-timed punches.

CONTINUED...

CONTROL BREATHING

Practice controlled breathing while hitting the bag. Proper breathing technique will help you stay relaxed and maintain energy throughout your training session.

INCORPORATE DEFENSE

Use the bag to work on your defensive maneuvers. Practice parrying, blocking, and evasive techniques to enhance your overall defensive skills.

INTERVAL TRAINING

Mix high-intensity bursts of punches with short rest intervals to simulate the intensity of a real fight. This will improve your conditioning and endurance.

STAY RELAXED AND COMPOSED

Avoid tensing up or overexerting yourself. Stay relaxed and composed during bag work to maintain good form and prevent unnecessary fatigue.

***ADDING EXTRA BAG WORK TO
THIS ROUTINE IS NEVER A BAD
IDEA***

SKILL SPECIFIC **DRILLS TIPS**

FOCUS ON TECHNIQUE

Pay close attention to your form and execution of each drill. Proper technique is essential for improving your skills effectively.

START SLOWLY

Begin the drills at a slower pace to ensure you are performing the movements correctly. As you become more comfortable, gradually increase the speed and intensity.

STAY RELAXED

Avoid tensing up during the drills. Stay loose and relaxed, as this will help you move more fluidly and efficiently.

REPETITION IS KEY

Practice each drill repeatedly to reinforce muscle memory and develop muscle coordination for specific movements.

BREAK DOWN MOVEMENTS

If a drill involves a complex combination or footwork sequence, break it down into smaller parts and practice each element separately before putting them together.

CONTINUED...

VISUALIZE YOUR OPPONENT

During the drills, imagine yourself facing an opponent. Visualize how you would respond and react in a real fight scenario.

STAY PATIENT

Skill-specific drills take time to master. Be patient with yourself, and keep practicing consistently to see improvement.

RECORD YOURSELF

As you become more proficient in a drill, increase the difficulty level by adding speed and power

STAY ENGAGED

Keep your mind engaged during the drills. Focus on the task at hand and avoid distractions to make the most of your training time.
